PRESIDENT'S MESSAGE

By Vicki Schmidt, CLA

Dear members:

Our June DCPA meeting is the last Thursday of the month, June 30th. By tradition we do not have a guest speaker this month but instead we have a longer business meeting and hear committee reports. This is one of my favorite meetings of the year because I get to visit with you members for an extended period of time and catch up on everyone's activities.

We will get to hear in depth reports from each of the committees and some special reports regarding the plans for the TAPS seminar coming up this Fall.

Earlier this month I represented the paralegal profession at the Career Day seminar for middle school students at Hedrick Middle School in Lewisville. I was a little nervous about describing our profession to 11, 12, and 13 year olds, so I asked my 11-year old granddaughter for advice. Among other bits of pre-teen wisdom, I learned that Trinity believes that talking about work is "boring" and that when she asks me "how was work" I usually say something like "it was not too bad" or "it was the same as always." Therefore, she has concluded that being a paralegal is not much fun. I tried to correct her perception, but when the rules of confidentiality come into play, there isn't a lot we can talk about.

Despite this food for thought, I went online to the Paralegal Division web site and watched a half-hour CLE on being a paralegal and got some good ideas from that. I gave my presentation to three different groups of students and didn't get stoned or booed by any of them. Most of the groups

wanted to know what kind of education was required to be a paralegal and how much money could be earned. A few wanted to know what I liked best about the job – that was harder – how do you explain the supreme satisfaction you get from closing the file?

There were 33 speakers in all and the school did a very good job of organizing the event. I felt good that I could cite the U.S. Dept. of Labor report that stated that the demand for paralegal professionals is expected to grow 28% in the next ten years.
